Portfolio: <https://khanimazimli.github.io/>

Professional Summary:

CRM and lifecycle marketing strategist in retail banking at International Bank of Azerbaijan (ABB), designing the customer decisioning logic behind personalized, trigger-based journeys across the customer lifecycle (activation, product adoption, retention) in the ABB Mobile app. Turns behavioral and transactional signals into segmentation, eligibility and suppression rules, decision trees, frequency caps and channel choice across push, in-app stories and banners, then measures conversion, retention and complaints to optimize the rules. Takes journeys live in a regulated bank with Data, Risk, Legal and QA teams.

Highlights:

- **Decisioning:** offer conversion +26% in 8 weeks; irrelevant-offer complaints -18%; campaign-linked CSAT +6.4pp
- **Retention:** salary churn down 12-16% and wallet share up 7-11% over 3 months
- **Activation:** 28% conversion on a live deposit campaign; push open rate from ~3% to 8% on ABB Wrapped

Professional Experience:

Lead CX Specialist (CRM & Personalization) at International Bank of Azerbaijan (ABB) 04/2026 - Present

Hyper-personalization squad: CRM journeys, customer decisioning and campaign automation in the ABB Mobile app.

- Own the design of ABB's Customer Journey Engine: journey architecture, trigger frameworks, decision trees and personalization logic deciding which customer gets which offer, when and on which channel.
- Design lifecycle journeys across four campaign mechanisms (action-based, event-based, hourly, task-based reward) and seven behavioral interest segments, from eligibility rules to push, banner and in-app story.
- Write suppression rules (blacklists, control-group holdouts, product exclusions, reward overlap, prior participation), entry locks and per-journey frequency caps that prevent over-messaging.
- Designed an event-driven journey where live weather forecast data selects the campaign day and sequences a teaser push, offer push and in-app banner, with monthly participation caps (pre-launch).
- Translate campaign logic into EVAM scenario specifications for real-time, event-driven automation, run scenario testing with QA, pull target segments in SQL and manage trilingual (AZ/EN/RU) content in Strapi CMS.
- Take campaigns from brief to production with Marketing, Data, Risk, Legal and QA; contribute campaign-design research to an AI agent being built for campaign work.

Customer Experience Expert (CRM & Retention) at International Bank of Azerbaijan (ABB) 03/2025 - 04/2026

- Created scoring, trigger and fatigue-cap logic for a behavior-based campaign engine using transaction and in-app signals; offer conversion rose 26% in 8 weeks.
- Tightened trigger eligibility rules; irrelevant-offer complaints fell 18% and campaign-linked CSAT rose 6.4pp.
- Defined functional salary churn by outflow ratio and 48-hour time-to-outflow, then targeted cashback packs by rule-based propensity; salary churn fell 12-16% and wallet share rose 7-11% over 3 months.
- Built dashboards joining transaction, in-app and voice-of-customer data; verbatim clustering cut insight cycle time 45%.

Marketing Specialist at PASHA Malls

07/2024 - 03/2025

- Diagnosed low adoption of the Leyli AI voice guide (privacy, social discomfort), redesigned entry cues and microcopy and ran a TikTok social-proof activation; daily interactions grew from 2-3 to 300-400+.
- Led the Ganja Mall website redesign (mobile-first bilingual IA, search-led navigation), validated with 1,420 responses; NPS rose from +12 to +31 and time-to-find fell from 47s to 18s.

Communications, External Relations and Publishing Coordinator at TISA

10/2019 - 06/2024

The International School of Azerbaijan, Baku: admissions, communications and digital channels.

- Redesigned the admissions journey and website IA around the applicant funnel, cutting repetitive inquiries 70% and lifting application completion to 95%.

Marketing Specialist at European Azerbaijan School

06/2019 - 10/2019

- Managed website, social and bilingual print content and coordinated Open Days to support admissions outreach.

- Compiled marketing performance reports from media monitoring and social engagement analysis to refine campaigns.

Education:

- **MA in Education Management (MAEM)** from ADA University (2018-2020)
- **BSc in Economics** from The Academy of Public Administration under the President of the Republic of Azerbaijan (2012-2016)
- **Certificate:** McKinsey Forward Program, McKinsey & Company (2022)

Core Skills:

- CRM and lifecycle strategy
- Trigger-based, event-driven journeys
- Behavioral and customer segmentation
- Cross-channel journey orchestration
- Personalization and offer targeting
- A/B tests and control-group design
- Customer decisioning (next-best-offer logic)
- Eligibility rules and decision trees
- Suppression, frequency capping, fatigue
- Retention and churn definition
- Campaign automation and scenario QA
- KPI definition and campaign measurement

Technical Skills:

- **CRM and journeys:** EVAM (real-time marketing automation), Strapi CMS; email: Mailchimp, Campaign Monitor
- **Data and analytics:** SQL (Oracle, working level), Excel (advanced), Tableau, Power BI (basic), Google Analytics, SPSS
- **Research and prototyping:** Figma, Miro, Maze, Useberry, Dovetail, HTML/CSS (AI-assisted prototypes)
- **Creative and collaboration:** Adobe Photoshop, Illustrator, InDesign, Premiere Pro, After Effects, Canva; Jira, Notion, Trello, Slack, Microsoft Office

Languages:

- **Azerbaijani:** Native
- **Turkish:** Fluent
- **English:** Fluent
- **Russian:** Limited

Projects:

Behavior-based campaign engine (retail banking, ABB) | Customer decisioning + personalization | 2025

- Scored customers on transaction, in-app and feedback signals, then used complaint and CSAT data to tighten eligibility wherever offers read as irrelevant.

Salary churn retention program (retail banking, ABB) | Retention + customer value management (CVM) | 2025

- Made salary churn a rule-ready metric (share of salary moved out, 48-hour outflow) and matched cashback packs to at-risk customers; on-us transactions rose 18-24%.

Deposit propensity x lifestyle affinity journey (retail banking, ABB) | Product adoption + cross-sell

- Turned two Data-built models into one cohort, a deposit plus partner lifestyle-benefit proposition, eligibility and activation logic, and an executable journey; reached 28% campaign conversion.

ABB Wrapped 2025 year-in-review | Lifecycle engagement + behavioral insight | 2025

- Owned insight framing, analytical logic and data guardrails for a personalized year-in-review built from transaction behavior; launch day drew 785K visits against a ~300K historical peak and push open rate rose from ~3% to 8% (directional).

In-app story campaigns with push (retail banking, ABB) | Segment campaigns + content operations | 2026

- Produced story sequences paired with push notifications for segment campaigns, including a summer campaign reaching a segment of 1.5M customers, with AZ/EN/RU copy for every slide.

CosmoPAY mobile banking app (fintech) | UX/CX design | 08/2023 - 01/2024

- Ran interviews, usability tests and competitor benchmarks and turned findings into IA, user flows, prototypes and UI.
